Partner Tech delivers dependable and robust point-of-sale (POS), self-checkout, and kiosk systems with versatile applications across various industries. Going beyond conventional POS innovation, we specialize in tailoring solutions to meet the unique demands of specific industries.

Retail

Partner Tech's comprehensive retail solutions includes everything from state-of-the-art POS terminals and mobile solutions to advanced kiosks and self-checkout systems. Our offerings extend beyond mere transactions; they are designed to level up the customer experience with swift and efficient processes, supporting multiple payment options. Moreover, Partner Tech provides cutting-edge digital signage solutions tailored for brand building and promotional activities. These dynamic displays not only enhance brand visibility, but also drive foot traffic, ultimately contributing to increased sales.

Restaurants, from Quick Service to Fine Dining

Elevate your business with Partner Tech's robust POS and self-service kiosk solutions, expertly designed to thrive in demanding hospitality settings. Partner Tech facilitates the ease of self-ordering in quick-service restaurants and empowers staff in restaurants, cafes, and bars with purpose-built POS terminals. These terminals enable seamless order handling, customer service, and swift payment transactions. Furthermore, Partner Tech's commitment extends to customer-facing displays and dynamic digital signage, which can serve as interactive menus or channels for brand building and communicating special offers.

Stadiums & Event Venues

Sports and concert-goers desire efficient service to avoid missing any action. Partner Tech's POS terminals and self-service kiosks are designed for stadiums and event venues, featuring user-friendly touchscreens and robust processors for swift transactions. Our durable, fanless hardware resists damage from dust, dirt, spills, or impacts common in busy venues. Additionally, Partner Tech provides advanced stadium digital signage that not only conveys information but also serves as potent tools for brand promotion, special offers, and creating an engaging atmosphere.

Cruise Ships

Partner Tech's POS solutions, crafted for implementation on cruise ships, exude sleekness and elegance. Encased in durable aluminum, they not only provide protection, but also ensure secure mounting on large-capacity vessels. The contemporary, space-saving design is especially beneficial in confined spaces, keeping counters uncluttered. These solutions boast advanced high-performance POS functionality, enabling swift transaction processing even during peak customer traffic.

Cinema

Elevate your cinema operations with Partner Tech's streamlined POS and kiosk solutions. Our space-saving terminals efficiently handle ticketing, payments, gift cards, ticket validation, and food orders. Designed for durability, they withstand occasional spills in the concession stand, conserving valuable counter space. Enhance your cinema experience further with Partner Tech's innovative digital signage solutions, creating an engaging atmosphere throughout your cinema space.

All-In-One Computers

Experience the power and durability of Partner Tech's all-in-one POS solutions, elegantly designed to enhance the aesthetics of your checkout area without sacrificing performance. These user-friendly POS terminals ensure swift and efficient service, offering exceptional value for your business with up to 5-years warranty on some models.

ALL-IN-ONE POS SOLUTIONS

Audrey A5 II

Enterprise POS for Retail & Hospitality

- Windows 10/11 & Linux Ubuntu 22.04
- 15.6" full HD anti-glare
- On-cell touch, optically bonded display
- Ultra-thin 7 mm bezel
- Front panel IP65, whole device IP54 certified
- High-performance Intel Tiger Lake and Elkhart Lake CPU
- High-speed M.2 PCIe SSD with up to 512 GB
- Support for Wi-Fi 6E
- Type-C connector
- Powered USB
- Support for up to three displays (staff-facing, customer-facing, digital signage)
- MSR, EMV reader, camera, 2D barcode reader, fingerprint reader, NFC reader
- Guest-facing displays: 2x20, 10.1", 11.6", 15.6"

ALL-IN-ONE POS SOLUTIONS

Audrey A4 / A5 / A7 *An Icon of Style and High-Performance*

- Windows 10/11 & Linux Ubuntu 22.04
- 15"/15.6"/21.5" all-in-one touch POS with full HD
- Front Panel IP65-rated, entire unit IP54-certified
- High-performance Intel Alder Lake or Elkhart Lake CPU
- High-speed M.2 PCIe SSD with up to 512 GB
- Support for Wi-Fi 6E
- 6 USB ports
- Type-C connector
- Powered USB
- TPM 2.0
- Support for up to three displays (staff-facing, customer-facing, digital signage)
- MSR, EMV reader, camera, 2D barcode reader, fingerprint reader, NFC reader

Packed with power, the Audrey Series is an all-in-one touchscreen POS computer that combines top performance and sleek, minimalistic design. Its compact footprint maximizes counter space, keeping it clutter-free with concealed cables. The modular design, offers various processors, memory sizes, and storage options, along with a wide range of payment and POS peripherals. Audrey is spill-proof, boasts a durable fanless design that shields it from dust and debris, and enhances resistance to shocks and vibrations. Adding to its appeal, Audrey comes with a 5-year warranty for Windows and a 3-year warranty for Android.

ALL-IN-ONE POS SOLUTIONS

Grace G4 / G5

The Smart Investment

- Windows 10/11 & Linux Ubuntu 22.04
- 15" or 15.6" PCAP touch full HD, all-in-one POS terminal
- Smart flip-over design
- IP54-certified
- High-performance Intel Kaby Lake and Elkhart Lake processors
- High-speed M.2 PCIe SSD
- TPM 2.0 support
- Support for two displays (main display + HDMI)

Grace is an all-in-one touchscreen POS terminal, packed with power in a compact and modern form factor and an excellent value for small and medium-sized retailers and restaurants. Based on powerful Intel processors and support for Windows, Grace is ready to do the job. G4 has a 15-inch touchscreen with traditional 4:3 ratio, ideal for retail, hospitality and food & beverage while G5 has a wider 15.6-inch display with 16:9 ratio that allows the content on the screen to be re-arranged in multi-zone mode, supporting kitchen display, surveillance, queuing, or even a business dashboard. The smart flip-over design makes Grace a versatile POS terminal for hybrid use.

Ethan E5

Everyday Powerhouse

- Windows 10 & Windows 11
- 15.6" all-in-one touch POS with PCAP full HD display
- Intel Alder Lake high-performance, fanless CPU
- Front panel IP65, whole device IP54 certified
- Maintenance and service friendly design
- High-speed M.2 PCIe SSD (option)
- 4 or 2 powered USB ports (option)
- Several different extra I/O expansion ports configurations (option)
- Supports TPM 2.0
- Dual LAN option
- Supports up to three displays (staff-facing, customer-facing, digital signage)
- Encrypted MSR, EMV reader, camera, 2D barcode reader, fingerprint reader, NFC reader

Ethan E5 is a 15.6" all-in-one POS solution designed for high-performance, capable of excelling even in challenging conditions. This technologically advanced solution provides industrial-grade performance paired with sleek design, making a significant impact on your store's or restaurant's environment. Its versatile, durable design with flexible connectivity options, enables it to support all your business requirements while standing up to harsh environments with occasional spills.

Joy J14

Compact Touch POS Terminal

- High-performance Intel Elkhart Lake and Tiger Lake CPU
- Fanless design
- 14" PCAP display
- Smart flip-over design
- HDMI 1366 x 768 @ 60Hz
- High-speed M.2 SSD
- Wi-Fi 6E option
- Type-C USB
- Support for TPM 2.0
- Windows 10 IoT Enterprise LTSC & Windows 11 IoT Enterprise GAC

Joy J14 is a compact 14-inch POS terminal with a versatile flip-over design for hybrid usage. Easily switch between use as a cashier-facing POS terminal and self-order terminal. With a powerful Intel processor, it's ready to run any application with fast response times.

ALL-IN-ONE POS SOLUTIONS

Cleo C10

Compact, All-in-One POS

- 10.1" LCD touch display
- Intel Elkhart Lake processor
- Support Windows 10/11 & Ubuntu 22.04
- Support Wi-Fi 6
- Embedded 80 mm thermal printer
- Embedded peripheral options: encrypted MSR, EMV reader, NFC reader, fingerprint reader

Cleo C14

Compact, All-in-One POS

- 14" LCD touch display
- Intel Elkhart Lake processor
- Support Windows 10/11 & Ubuntu 22.04
- Support Wi-Fi 6
- Embedded 80 mm thermal printer
- Embedded peripheral options: encrypted MSR, EMV reader, NFC reader, fingerprint reader

Efficient and robust, Cleo is an all-in-one POS terminal that combines space-saving design with a built-in receipt printer, optional customer-facing display, and integrated peripherals for preferred payment methods. The cleverly designed base conceals cables, ensuring a clutter-free checkout counter. Equipped with a built-in thermal printer, optional readers for magnetic stripe, EMV chip, NFC contactless payments, and a fingerprint sensor, the base enhances functionality. The main touch display, with adjustable viewing angles, attaches to the base, as does the optional customer-facing display. Additional peripherals, like a handheld scanner or payment terminal, can be connected through ports at the base's rear. Cleo is compatible with Windows 10/11, Android 12, and Linux Ubuntu.

Android POS Solutions

Android POS solutions are not only easy to use and customize, but they also offer a familiar user experience to the majority of the workforce. As a result, Android is becoming increasingly popular to use for mobile POS. Our user-friendly Android solutions keep your staff connected to mission-critical business applications to ensure fast, efficient, and accurate service.

ANDROID POS SOLUTIONS

Audrey II-R

Android-Based POS terminal

- 15.6" PCAP, full HD, anti-glare display
- On-cell touch, optically bonded display
- Ultra-thin 7 mm bezel
- Rockchip RK3399 processor (Dual Cortex-A72 + Quad Cortex-A53, 64-bit)
- Android 13
- Type-C USB connector
- Front panel IP65, whole device IP54 certified
- Support for Wi-Fi 6E
- Encryption-capable MSR, EMV reader, NFC/RFID reader, fingerprint reader, camera, 2D barcode reader, customer displays

Audrey II features the powerful RK3399 processor and the latest Android 13 operating system, delivering unparalleled performance with swift multitasking and robust application support. Engineered for performance and reliability, this cutting-edge terminal delivers lightning-fast processing capability, ensuring seamless transactions for an enhanced customer experience.

Audrey A7

An Icon of Style and Performance

- 21.5" PCAP touch, full HD display
- Rockchip RK3399 processor (Dual Cortex-A72+ Quad Cortex-A53)
- 32GB eMMC + 1 micro SD card slot (up to 256 GB)
- Android 11
- Sleek and stylish design
- Front panel IP65, whole device IP54 certified
- Encryption-capable MSR, EMV reader, NFC/RFID reader, fingerprint reader, camera, 2D barcode reader, customer displays

Packed with power, Audrey A7 (21.5") Android POS computers offer top performance in a sleek, minimalistic design. With concealed cables and a modular configuration, it saves counter space and adapt to your application's needs. A large selection of payment and POS peripherals enables Audrey to be tailored to the business needs. The durable, fanless design ensures resilience to dust, shocks, and vibrations and provides silent operation. Audrey is spill-proof, ideal for demanding environments like restaurants.

ANDROID POS SOLUTIONS

Cleo C10

All-in-One Compact POS

- 10.1" PCAP touch display
- All-in-one compact POS
- Quad-core ARM Cortex-A55 processor
- Android 12
- Wi-Fi 6 support
- Embedded 80 mm thermal printer
- Encryption-capable MSR, EMV reader, NFC, fingerprint reader

Cleo C14

All-in-One Compact POS

- 14" PCAP touch display
- All-in-one compact POS
- Quad-core ARM Cortex-A55 processor
- Android 12
- Wi-Fi 6 support
- Embedded 80 mm thermal printer
- Encryption-capable MSR, EMV reader, NFC, fingerprint reader

Packed with power, Cleo delivers top performance in a compact, minimalistic design that elevates the checkout experience in retail and hospitality. The C10 & C14 Android versions are built on the latest ARM-based technology and Android 12. The powerful processor, a built-in thermal printer and a large variety of peripherals, ensure that Cleo is capable of high-speed data processing and responsiveness in any user scenario.

ALFA Mini

ALFA Pro

ALFA Series

Compact Industrial Computer

- ALFA Pro (4 x powered USB) & ALFA Mini (ultra-slim, low-profile)
- Windows 11/10 & Linux Ubuntu 22.04
- Intel Elkhart Lake or Tiger Lake i3, i5, i7 processor
- Fanless design for durability
- Two front-facing USB ports
- Up to 1 TB M.2 PCIe SSD
- Up to 32GB DDR4 DRAM
- Durable die-cast aluminum casing

A compact industrial computer, specially designed for demanding retail and hospitality applications, featuring a fanless, noise-free computer with a large selection of ports to connect POS peripherals, displays and digital signage.

ALFA Max Series

High-Performance Industrial Computer

- ALFA Max & ALFA Max Pro (4 x powered USB)
- Windows 11/10 & Linux Ubuntu 22.04
- Alder Lake processor
- Supports 2 SATA SSDs
- Supports 2 LANs (IEEE 802.3 10/100/1000 Mbps)
- TPM 2.0 support
- Durable die-cast aluminum casing

The ALFA Max system is designed to support two Solid State Drives (SSD), ensuring lightning-fast data access and storage capabilities. With dual LAN ports, you can count on enhanced network connectivity and reliability, meeting the demands of modern computing applications. Powered by the latest Alder Lake CPU, ALFA Max delivers unparalleled processing performance.

Enterprise Tablet Solutions

Tablet computers offer significant advantages in the retail sector, enhancing customer experiences and optimizing operations. Their portability allows for flexible point-of-sale transactions, enabling staff to assist customers anywhere in the store. Retailers can efficiently manage inventory, update prices, and access real-time data, improving overall efficiency.

WINDOWS ENTERPRISE TABLET SOLUTIONS

M3w-2

Rugged Hybrid Tablet POS Solution

- Windows 10 IoT LTSC
- Intel® Pentium® N4200 processor
- 10.1" PCAP display
- 3.2 ft/1 m drop specification
- Wi-Fi & Bluetooth
- Cellular (WWAN)
- IP65 (tablet), IP54 (with MSR/EMV/barcode reader)
- For indoor and outdoor use
- Hot swappable battery
- Rotatable 2D barcode scanner
- Encryption-capable MSR, EMV reader, fingerprint reader, NFC reader
- POS base option

The M3w-2 enterprise tablet is robust and powerful, designed to endure with an IP65 rating (IP54 with peripherals) and a 3.2 ft drop specification. It seamlessly transforms into a countertop POS terminal when placed in the lockable POS stand, equipped with ports for connecting a cash drawer, printer, customer display, and Ethernet.

POS Base for M3w-2

Rugged Hybrid Tablet POS Solution

- Adjustable viewing angle up to 180° for seamless customer interaction and signature capture.
- Secure tablet operation in locked or unlocked positions
- The stand can be mounted onto the countertop
- Optional powered USB ports (1x12v, 1x24v)
- Connect printer, cash drawer, customer display
- Mobility ready, tablet attaches to the base without removal of the hand strap

The M3w-2 tablet excels as a mobile device, and its POS base enhances its versatility as a hybrid countertop POS terminal. The base features various ports for Ethernet and peripherals like a printer, cash drawer, and customer display. A secure key lock ensures the tablet stays in place, and adjustable viewing angles, including a 180° flip for customer signatures, cater to the needs of both cashiers and customers.

EM08 & EM10

Rugged Android 11 Tablet

- High-performance octa-core processor
- Support for Android 11
- Available with a 8-inch and 10.1-inch display
- Lightweight and sleek
- Rugged with IP65-rating
- 3.3 ft /1 m drop specification
- Full HD PCAP touch display
- 400 nits brightness

Powerful Android 11 tablet, available in a 8-inch and 10.1-inch version. Durable, but sleek design with a IP65-rating a 3.3 ft drop specification. Equipped with a powerful battery for long workshifts with use of the built-in 13MP camera, imager and NFC reader.

Mobile Computers

Work from anywhere you want. Partner Tech's mobility solutions, include both tablets and mobile computers, enabling you and your staff to break free from the confinements of a traditional POS terminal.

MT-6620

Handheld Terminal

- Rugged, IP65-rated handheld computer
- Windows 10 IoT, 32-bit
- High brightness display for sunny outdoors use
- Durable and scratch resistant Gorilla glass
- IP65-rated
- Capacitive multi-touch that supports glovetouch
- Cellular (WWAN), Wi-Fi, Bluetooth
- 5000 mAh removable battery
- 1D/2D barcode reader, NFC/RFID reader (option)
- Docking station and pistol grip (option)

The MT-6620 is a handheld terminal with a 6-inch, multi-touch screen, empowering your store workers to capture and access data from anywhere in the store. The rugged design with a IP65-rating protects it from water and dust and it has a 4 ft drop specification.

MC66

Rugged Mobile Computer

- 5.5" high definition full display (18:9)
- Multi-touch (supports gloves and wet hands)
- Qualcomm 2.0 GHz octa-core
- Android 11
- Cellular (WWAN), Wi-Fi, Bluetooth
- Google Mobile Services (GMS) certified
- Supports up to 128 GB micro SD card
- Scratch proof Corning Gorilla glass
- 6 ft / 1.8 m drop specification
- IP65-rated
- 13 MP camera with autofocus and flash
- 2D barcode imager (option)
- RFID reader (option)

Opt for our Android-based mobile computer with all the tools your workforce needs for seamless communication and data collection. Featuring a robust 5.5-inch multi-touch display with durable Gorilla glass, IP65-rating, and a 6-ft drop specification. MC66 is available with an optional built-in UHF reader or an ergonomic UHF sled for extended reach and speed.

POS Peripherals

Partner Tech offers everything you need to create an optimal POS solution. Just like our entire product line, our peripherals are carefully crafted to precisely meet the unique requirements of your business and applications.

- Cash drawers
- Customer displays
- Receipt printers
- Printer Stands
- Barcode scanners

Coco

A Sleek, Contemporary Customer Display

- 10.1" full HD display provides an unparalleled viewing experience
- Ultra slim bezel
- Sleek, modern design
- Available with two different desktop stands for placement closer to the customer
- Can be mounted directly on a Partner Tech POS terminal
- Optional payment module with support for MSR, EMV and contactless

Coco is elegant customer display that elevates your visual experience with a state-of-the-art 10.1" full HD second, customer-facing display that is available with several different desktop stands or it can be mounted on one of Partner Tech's POS terminals. The genius solution redefines clarity and precision and is available with two different base options.

SMART EXTENSIONS

EX-300

I/O Expansion Box for Partner Tech POS

- supports standard 75 x 75 VESA & wall mount

Option1

Option2

EX-100

Powered USB Extension for Audrey POS

- 4 x Powered USB (3 x USB 12V, 1 x USB 24V)

EX-101

USB Extension for Audrey POS

- 7 x USB 3.0

EX-100 and EX-101 can be integrated into the base of Audrey and Audrey II

PRINTER STAND

Supported Printers
Partner Tech RP-700
Epson TM-T70
Star mC-Print3

PS-103/PS-107 *Cosmo Printer Stand*

- Aluminum construction 75 x 75 standard VESA mount
- Compatible with Partner Tech A4/A5/A7/E5/G4/G5/J14
- Supports the main display + one customer display
- Supported printers: Partner Tech RP-700, Epson TM-T70 and Star mC-Print3
- One single power source
- Optional USB hub with four powered USB ports
- Supports secondary storage and RAID function (subject to POS terminal function)
- Dimensions (W x H x D) :
PS-103: 225 x 390 x 270 mm / 8.86 x 15.35 x 10.63 in
PS-107: 732 x 324 x 272 mm / 28.82 x 12.76 x 10.71 in

The PS-103/PS-107 is a sleek printer stand designed to complement Partner Tech's all-in-one POS terminals. With a modern silver and black design, it seamlessly blends into POS environments, providing stability for the printer and VESA-mounted POS terminal. The stand conceals all cables for a clutter-free counter space and offers the convenience of accommodating a USB hub with four powered USB ports.

SELF-CHECKOUT

AI-Powered Theft Protection Modular & Sleek Design

Partner Tech's cutting-edge SCO solutions combine intuitive, space-saving design with smart AI-driven fraud prevention. These comprehensive solutions offer everything you need, including SCO hardware, peripherals, and software with an API tool kit for integration with the retailer's POS system. In addition, Partner Tech offers implementation services and diagnostics with real-time SCO monitoring to proactively track the performance of the system.

SeeYourSCO – Real-time KPI Monitoring & Management

Partner Tech offers the capability to track and manage all the self-checkout stations remotely – in real-time. This allows merchants to proactively monitor the system's KPI metrics in real-time and quickly identify issues. This is mission critical to minimize downtime, increase usage and prevent fraud.

AI-Powered, Modular & Design Forward

Starling SCO

Fully Integrated Self-Checkout

A fully integrated, AI-driven self-checkout solution that has everything you need in a compact and modern design. Customizable with different display sizes, security features, color options and peripherals.

- Fully integrated SCO
- 15.6" or 21.5" display
- Camera for item identification
- Surveillance camera
- Security scale for weight verification
- Age verification camera
- Bioptic 1D/2D scanner with produce scale
- Electronic Article Surveillance (EAS)
- Brackets for payment terminal
- Cash management option
- LED tri-light pole

Alfred SCO

Universal Tabletop Self-Checkout

A modular self-checkout solution with a universal tabletop mount that can be installed on any type of counter. Customizable with different display sizes, security features, and peripherals.

- Tabletop installation
- 15.6" or 21.5" display
- Camera for item identification
- Surveillance camera
- Security scale for weight verification
- Age verification camera
- Bioptic 1D/2D scanner with produce scale
- Electronic Article Surveillance (EAS)
- Brackets for payment terminal
- Cash management option
- LED tri-light pole

Interactive Kiosk Solutions

Empower your customers with the convenience of self-service kiosks for use in retail, food service, lodging, healthcare, transportation, government, gaming, and hospitality. Partner Tech's family of space-saving kiosk solutions, includes countertop, floor-standing, wall mounted as well as double-sided kiosk models, designed to address diverse requirements and budgets. Our kiosks come in display sizes ranging from 15 to 32 inches and can be configured with different processors, memory sizes, and peripherals to cater to different needs.

K27 II

Single & Double-Sided Kiosk

- Bright 27" (1920 x 1080) PCAP touch display
- Wall mount or floor stand
- Single or doublesided operation
- Support for Windows 10/11, Linux Ubuntu and Android 11
- Fanless, high-performance CPU (Windows – Kaby Lake, Elkhart Lake, Alder Lake) (Android – Rockchip ARM RK3399)
- Multiple payments options (MSR, EMV and contactless)
- Customizable and modular design
- ADA keypad (option)
- Color, shape and appearance customization service

Cut labor costs, reduce wait times, and boost capacity effortlessly with Partner Tech's K27 II kiosk, ideal for quick-service restaurants, as well as hospitality and retail settings. The K27 II allows you to optimize floor space with its compact design, available in wall mount or floor stand options, including the flexibility of double-sided operation.

Equipped with a 3-inch thermal printer and a customizable range of peripherals, the K27 II adapts to your needs. Choose from options such as a 2D barcode scanner, EMV terminal brackets, 5MP camera, RFID/NFC reader, ADA keypad, and LED indicator lights. Engineered for maximum reliability and uptime, and the rugged and lockable enclosure shields the kiosk from damage. Easy-to-replace modules keep repair costs low but, also minimize disruptions to your operations.

INTERACTIVE KIOSK SOLUTIONS

Countertop Stand OR
Floor Stand

Alfred AD-215/156

Self-Service Kiosk

- 21.5" or 15.6" anti-glare PCAP touch display (portrait or landscape)
- 1920 x 1080 (300 nits)
- Android 11, Windows 10/11 & Linux Ubuntu 22.04
- Intel Kaby Lake, Elkhart Lake, Alder Lake (Windows)
Rockchip RK3399 (Android)
- Countertop / floor stand / VESA wall mount
- Built-in printer & payment capabilities
- MSR, ADA keypad, payment terminal brackets, 2D barcode scanner, 5 MP camera, RFID/NFC reader, LED status indicator (options)
- Wi-Fi and BT connectivity (options)

The Alfred AD-215/156 self-service kiosk expedites ordering and checkout for quick-service restaurants and convenience stores. Additionally, it enhances self-check-in processes at doctor's offices, corporate offices, and hotels. With a choice of a 15.5- or 21.5-inch PCAP display, the kiosk includes an integrated thermal printer and a diverse range of POS and payment peripherals. Alfred's space-saving design offers flexibility with options for a floor stand, countertop stand, or wall-mounted installation.

AD-215-H

Hotel Self-Service/Check-in Kiosk

- 21.5" full HD PCAP display
- Intel Alder Lake & Elkhart Lake CPU
- High speed M.2 PCIe
- OCR scanner for verification of ID documents
- Hotel key dispenser
- Countertop / floor stand
- NFC/RFID reader, cash module, body temperature measurement, payment bracket, information rack, camera, LED status indicator (options)

AD-215-H is a robust 21.5" hotel self-service kiosk designed for maximum efficiency, longevity, flexibility, and scalability. Self-service not only eliminates waiting in long check-in lines, but also makes the check-in/check-out process more convenient and private. AD-215-H offers various payment options and ways to interact with your customers. With an integrated high-quality OCR scanner, AD-215-H can provide accurate ID documents verification to speed up the check-in process.

AD-215-S/ AD-156-S

Self-Service Checkout Kiosk

- 21.5" or 15.6" anti-glare PCAP touch display (portrait or landscape)
- 1920 x 1080 (300 nits)
- Android 11, Windows 10/11 & Linux Ubuntu 22.04
- Intel Kaby Lake, Elkhart Lake, Alder Lake (Windows) Rockchip RK3399 (Android)
- Wi-Fi and BT connectivity (options)
- Floorstand & two side tables
- Built-in printer & payment capabilities
- Embedded high-speed 2D area imager for barcode scanning
- MSR, ADA keypad, payment terminal brackets, 2D barcode scanner, 5MP camera, RFID/NFC reader, LED status indicator (options)

Maximize checkout efficiency with the AD-156-S self-checkout kiosk, perfect for grab-and-go shopping in high-volume retail settings like convenience, drug, specialty, liquor, and hardware stores. The embedded 2D area imager ensures swift scanning, enhancing throughput. Alfred facilitates seamless payments, supporting debit, credit cards, contactless, and mobile payments. The integrated 3-inch thermal printer swiftly produces receipts and coupons, while two durable side tables offer convenient space for items and bags.

Cloud Device Management (CDM)

Real-time Management of All Your POS, Kiosks, Mobile Devices and Peripherals

Remotely manage device updates and system maintenance and proactively monitor performance and resolve problems before they impact productivity and the customer experience.

Device Management

- Remotely monitor and manage all devices and peripherals
- View online/offline status for all devices and peripherals
- Easily assign task by device or group(s)
- Supports remote control connection through third party applications

System Updates

- Install and uninstall software
- Update drivers, applications, and firmware
- Manage backups, factory resets, and reinstall system backups
- Apply tasks to a single device, all devices, or to a group of devices

Lifecycle Tracking

- Track the health of your terminals to plan upgrades and prevent failure
- Access information about the OS and BIOS versions, installed apps, and the status of the device's hard drive, RAM, storage and processor

Task Management

- Schedule daily, weekly or monthly maintenance tasks
- Define if tasks should run overnight or require user approval
- View all assigned tasks and if they were successfully implemented

User Management & Notifications

- Manage user access and create new CDM admin accounts
- Set conditions (terminal off-line, CPU busy, storage low) for when notifications should be sent to assigned contacts

Digital Signage Solutions

Interactive, dual-sided, transparent, or thin bezel — Partner Tech covers all of your digital signage needs for any space or venue. Our broad selection of digital displays paired with X-Sign, Partner Tech's digital content management solution enables our customers to find the right solution for them.

Digital Signage Overview

- Bar type: 28", 38"
- Video wall: 49", 55"
- Touch interactive: 42", 49", 55"
- Transparent series: 24", 32"
- Double-sided display: 55"

Features Overview

- Cloud platform with a versatile expansion framework provides flexibility and full scalability
- A turnkey digital signage solution with hardware, software, and services
- Remote central management via the cloud
- Internet of Things (IoT) and big data analytics provides a 360-degree view of the performance.
- Create and publish dynamic content with X-Sign digital signage solution

Create and Deliver Engaging Content for Your Digital Signage

Create and deliver engaging and interactive content for all your displays – with minimal cost and effort, using the X-Sign digital signage solution.

Dynamic Content Creation for Displays

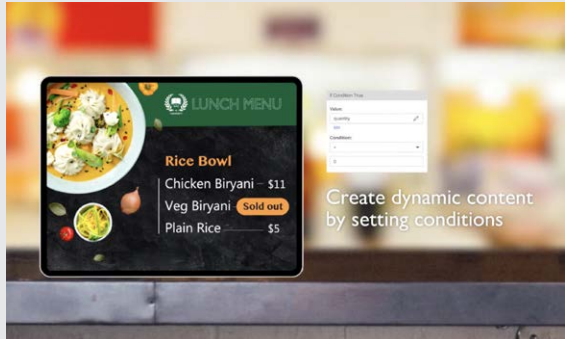

X-Sign is a cloud-based signage solution that transforms displays into interactive billboards with dynamic content updates based on variables such as inventory, time of day, and weather. Effortlessly create professional, interactive content using customizable templates with support for all types of displays (4K, FHD, stretch displays, and video walls). Ideal for creating interactive menus, product catalogs, schedules, promotions, etc..

Advance Scheduling & Central Management

X-Sign facilitates intuitive advance scheduling via a web-based calendar and displays can be grouped by department or location for targeted content delivery. X-Sign enables you to remotely control and monitor all displays in real-time.

Track Customer Engagement

X-Sign collects valuable data about how customers engage with your content. By tracking user interactions, you will gain insight into user behaviors, popular content and user preferences.

Create dynamic content that adapts to changing circumstances such as low inventory or time of the day.

An Industry Leader in Product Development

For years, Partner Tech has been at the forefront of the POS industry, setting the standard for innovation with other manufacturers following our path. We proudly introduced several global firsts in the POS industry, including:

- Launched the first all-in-one POS with an integrated printer
- Introduced the first compact touch terminal
- Pioneered fanless POS technology to safeguard internal components from dust and dirt
- Developed the first POS base for our enterprise tablet, enhancing its functionality for retail use
- Spearheaded AI-powered self-checkout

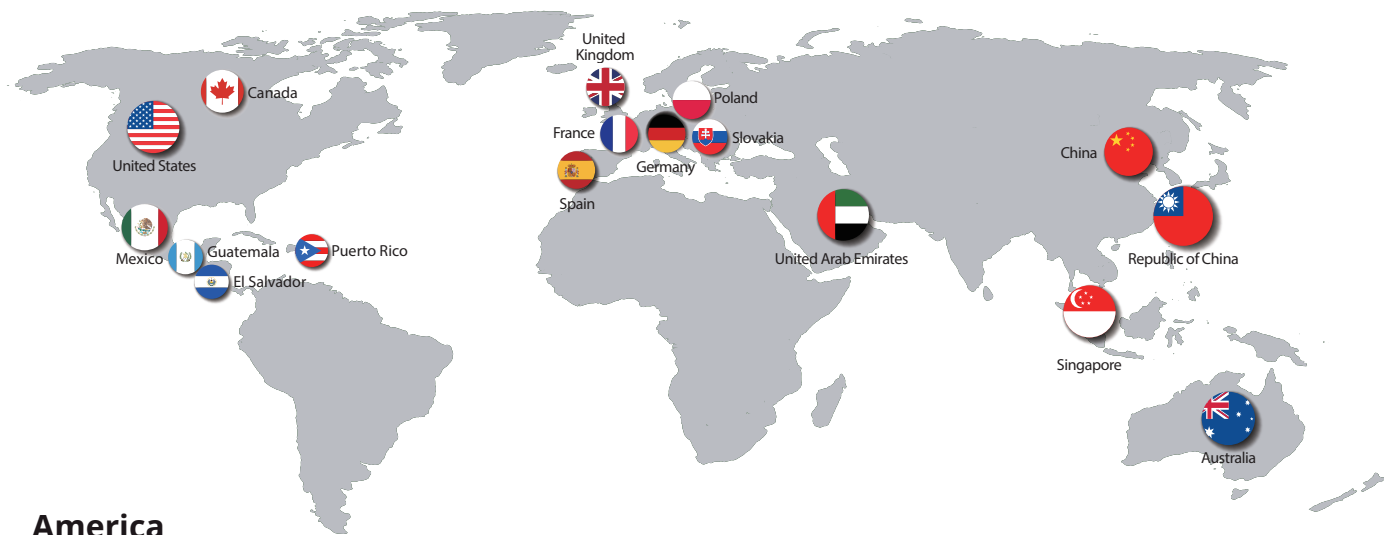

Our dedication to innovation remains unwavering as we consistently launch new products aimed at streamlining processes and enhancing customer experiences.

OUR PROMISE FOR THE FUTURE

Partner Tech is committed to continuous innovation for our customers. In an effort to enhance research and product development, Partner Tech joined the \$52 billion Qisda Group, a leading ODM/OEM electronics company. This strategic move has bolstered our competitive advantage by granting us access to the expertise of 120 engineers and a large 500,000 square-meter production facility.

Our dedicated R&D teams tirelessly strive to deliver top-notch solutions, maintaining this commitment as the retail and restaurant industries undergo constant evolution. Another integral aspect of our commitment lies in our focus on social responsibility and sustainability. We prioritize environmental preservation in every aspect of our production and operations, be it in the supply chain, transportation, or manufacturing. Partner Tech places a strong emphasis on resource conservation, resonating with our customers, partners, suppliers, and employees. This commitment shapes our production processes and corporate practices, reflecting a deep respect for our children, future generations, and the planet.
